Background & Research

Product Brief

The goal of this project is to release batch redaction - the redaction of multiple documents in one process

- Users will be able to select multiple files and folders and the process [DBT-47236: Batch save redacted copies](#) **DONE** will directly create redacted copies
- They will be able to apply AI categories [DBT-46990: Batch redaction by categories](#) **DONE** and multiple search terms [DBT-46991: Batch redaction by search terms](#) **DONE**
- The batch redaction process creates multiple redacted copies without user confirmation of individual documents or markups
- Users are informed via [DBT-47237: Reports and Notifications](#) **DONE** about
 - pre-redaction report: files that can/cannot be redacted before applying redaction
 - post-redaction report: files that were not redacted due to missing matches or technical errors
 - notifications: the current process

Problem Discovery

Why are we doing this? And why should we do this now?

Single document redaction is not sufficient when users need to redact a lot of files. Especially in M&A deals, users have to redact a ton of documents. There is also a need for NPL transactions, where there is less document variety but lot of quantity.

User Personas

User Persona - Junior Analyst M&A

Name: Justus

Age: 23-30

Job: M&A Analyst/Associate

Pains:

- Working long hours (up to 100 h per week)
- Repetitive workflows

Needs/Wants:

Background:

- Business/Law graduate
- 2-5 years of experience
- ambitious

- More efficient workflow
- Getting the deal done smoothly
- Getting promoted → reduce time spent in datarooms
- Collaboration with colleagues

Quote:

"I spent 70% of my time in the dataroom with redaction"

Fears:

- Not meeting deadlines
- Making mistakes that infringe the deal (e.g. showing wrong information to wrong person)

User Persona - M&A Team Lead

Name: Jordan

Age: 30-50

Job: M&A Manager/Director

Pains:

- Acquiring new clients
- Making decision with incomplete information
- Supervising team

Needs/Wants:

- Getting concise reports out of datarooms

Background:

- Business graduate
- 5+ years of experience
- ambitious

Quote:

"I don't spend time in the dataroom, I usually get all my information via email"

Fears:

- Making wrong decisions

User Persona - CS Manager Drooms

Name: Bet

Age: ?

Job: CS Team Lead

Pains:

- UI issues with Nymiz
- No way of editing redacted documents in Nymiz
- No review of uploaded documents

Needs/Wants:

- Bulk redact documents
- templates for specific docs (specifically NPL)

Background:

- Business/Law graduate
- 8+ years of experience
- ambitious

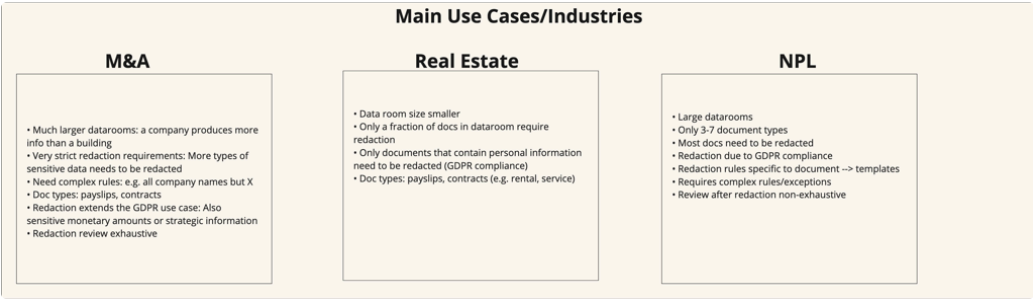

Quote:

"Once we have bulk redaction we can cancel the Nymiz subscription"

Fears:

- Deadlines for redaction as a service
- Missing to redact sensitive data

Industries

Solution Discovery

Goal and Value Proposition

Like in with single-document redaction, the value proposition for batch redaction in a data room lies in its ability to streamline and enhance the security of document management processes. This feature ensures compliance with privacy regulations and confidentiality requirements, mitigating the risk of data breaches and legal liabilities.

By employing batch redaction, users can efficiently hide sensitive information across multiple documents simultaneously, saving considerable time and effort compared to manual redaction and single-document redaction.

Impact

Given that approximately 66% of our customers consider Redaction as a must-have (23%) or a nice to have (43%), redaction is very important for us. Unfortunately, our competitors were the first-movers with redaction. By offering, batch redaction, we can an advantage against our competitors and potentially regain lost customers

User Impact

This section explores how the software can address user needs, enhance efficiency, reduce costs, or provide any other positive outcomes that users are likely to encounter.

Company Impact

This may include factors such as increased revenue, improved operational efficiency, enhanced reputation, or market differentiation.

More efficiency on redaction process for multiple docs	More deals closed due to (batch) redaction
	USP against competitors
	More redacted documents → more revenue for Drooms

Success metric

List 3 Success metrics as draft for open discussion.

- Batch redaction adoption rate
- number of

Legacy information

Discussion with CS/Sales/Users

Customer Success

- CS currently uses an expensive external tool (Nymiz) to handle batch redaction (specifically for NPLs)
1. Icon for draft documents not just redacted ones
 - a. Also continue redaction instead of start redaction
 2. Bulk redaction
 - a. Batch apply to folder
 3. Needs to be highlighted what categories were selected
 4. Whitelisting
 - a. Batch upload a list as excel/csv
 5. Blacklisting
 - a. Batch upload a list as excel/csv
 6. Directly select word in doc viewer
 - a. Add word to blacklist or whitelist
 7. Select word to assign it to category
 - a. Poisoning model
 8. Excel doc
 - a. Redaction excel

- b. Also deleted data on excel viewer
- 9. Search not easy to find mistake with OCR
 - a. With redaction you see OCR errors

Aimed Release

TBD

Price

Batch redaction is an individual module and can be priced individually

- Additional revenue due to more redacted pages
- Possibility to Price batch redaction separately or within a bundle of features
